Japanese Utility Model Kokai No. 62-114781

Laid-opening date: 21 July 1987

Application No.:   61-854

Filing date: 08 January 1986

Applicant: Mitsubishi Pencil Co. Ltd., Tokyo

Title: Hairy writing core

Claim:

A hairy writing core composed of a bundle in which a great number of chemical fibers 3, 3', 3" are blended, said fibers being wrinkled in a wave form and each having different wave length.

INDUSTRIAL FIELD OF THE INVENTION

This invention relates to a hairy writing core used for writing devices such as hair pencil.

ENBODIMENT

Fig. 1 is a perspective view of the tip portion of a hair pencil (2) mounted with a hairy writing core (1), and Fig. 2 is a plan view of several chemical fibers (3), (3'), (3") extracted out of the hairy writing core (1). As shown in Fig. 2, the respective fibers (3), (3'), (3") are wrinkled in a wave form, and their wave lengths (the distances between the wave lands or between the roots, i.e. T1, T2, T3 in the drawings) are different from one another (namely, T1 $\neq$ T2 $\neq$ T3). The hairy writing core (1) is formed such that a great number of said fibers are bundled and their tips are made sharp.

Brief Description of the Drawings:

Fig. 1 is a perspective view of the end of the hair pencil mounted with the hairy writing core; and

Fig. 2 is an enlarged plan view of the fibers to be elements composing the hairy writing core.

In the drawings:

      (1)...Hairy writing core

      (2)...Hair pencil

      (3), (3'), (3")...fibers
